Before the first visitors arrive · Preguntas 1 a 5

The text below was written for the newsletter of a marine centre. Read it and answer the questions that follow.

My name is Tomás Aguilar and I am the engineer of the Coastal Marine Centre. Most visitors never see my workshop, but nothing here moves without it. I arrive at half past six, long before the doors open at nine. The first job is always the same: check the two boats that the divers will use during the morning. I test the engines, look for salt on the metal parts and change anything that looks tired. Salt is my real enemy; it eats steel while everybody sleeps. The rest of the day belongs to repairs. Pumps break, cables burn, a propeller hits a rock. I keep a list on the wall and I never manage to finish it. People imagine that the mechanical work is the difficult part, but it is not. The hardest thing for me is deciding, alone and in five minutes, whether a boat is safe to go out. If I say no, the whole programme stops and somebody is angry with me. I have learnt to say no anyway. I do not work alone. Two skippers tell me what they felt in the engine before I open it, and their descriptions save me hours of searching. In August we opened the workshop to a group of students from the town. Three of them still come every Saturday with dirty hands and a hundred questions.

1 What is the writer mainly doing in this text?

A. warning visitors not to walk into the workshop
B. explaining what his job involves and what it demands of him
C. giving instructions for repairing a boat engine
D. asking the centre for better tools and more money

2 For Tomás, the most difficult part of his job is

A. finding salt on the metal parts of the engines.
B. keeping the list of repairs on the wall up to date.
C. arriving at the workshop before sunrise.
D. deciding quickly whether a boat is safe to sail.

3 Why are the two skippers useful to Tomás?

A. They repair the pumps when he has too much work.
B. They decide which of the two boats can go out.
C. They buy the spare parts that he needs.
D. They tell him what they felt in the engine before he opens it.

4 The end of the text mainly shows that Tomás's work also

A. has forced the two skippers to change jobs.
B. has made him well known in the town.
C. has attracted young people to the workshop.
D. has stopped the centre from working at weekends.

5 Which piece of advice would Tomás most probably give to a young mechanic?

A. "Say yes to every trip, even when you are not sure about the boat."
B. "Work fast and never write down what is still broken."
C. "Listen to the people who use the machine, and be ready to say no."
D. "Stay away from salt water and repair engines in the city."

The story of the postcard · Preguntas 20 a 25

The following article appeared in a history magazine. Read it and answer the questions that follow.

Today a postcard looks old-fashioned, but when it appeared it was the fastest way to send a short message. The first cards were printed in Austria in 1869. They cost half the price of a letter, and someone who had no time to write a long page could post a few lines in the morning and receive an answer the same evening. Not everybody was pleased. Clerks complained that the words were written on the open side, so anyone could read them, and many families thought it was rude to send a message that was not inside an envelope. The rule changed in 1902, when the British post office allowed the address and the message to share one side. From that moment the whole front of the card was free for a picture. Cheap colour printing arrived at the same time as the railway holiday. Visitors who travelled to the coast bought a card with a photograph of the beach and posted it before they went home. In 1908 people in Britain sent more than eight hundred million cards. Far fewer are sent now, but collectors pay high prices for the oldest ones, and every country still prints its own scenes.

20 When postcards appeared, people used them mainly to

A. collect pictures of the coast.
B. write long, private letters.
C. send a short message quickly.

21 According to the first paragraph, people chose postcards because they

A. were more expensive than an ordinary letter.
B. cost half the price of a letter and travelled fast.
C. could only be sent inside an envelope.

22 The whole front of the card became free for a picture because

A. photographs were cheaper than drawings.
B. the address and the message were allowed to share one side.
C. travellers asked the printers for bigger cards.

23 Who bought the cards that showed a photograph of the beach?

A. Collectors of very old cards.
B. Visitors who travelled to the coast.
C. The clerks of the post office.

24 The number of cards sent grew enormously because

A. cheap colour printing arrived together with the railway holiday.
B. the post office reduced the price a second time.
C. ordinary letters disappeared completely.

25 The last sentence suggests that postcards today

A. are printed with exactly the same image everywhere.
B. are no longer produced anywhere.
C. still show images that belong to each country.
